

# Scotsburn – A Boutique Production Nursery.

## OUR MISSION

Great gardening is healthy, rewarding, richly variable and environmentally positive. So are our plants.

Great teams are made up of skilled, well trained, passionate, happy people empowered to work independently towards a common goal. So will our team.

Great organizations care for their staff and their customers, they provide direction and listen to advice, and they are financially sound and invest in the future. This will be our company.

## AT SCOTSBURN WE VALUE:

Teamwork	“We’re a happy team at Scotsburn”. Sporting analogies can be over done, but there is little more inspiring than blending of the strengths and talents of individuals in a great team. Great teams stick together and work toward a mutual goal.
Respect, Trust and Reliability.	“Just a little bit”. Great teams are built on respect for, trust in and reliance on each other.
Honesty	“Honesty is the best policy”. Not everything goes to plan, especially not when we work with nature. Honesty in victory and defeat binds teams together and makes them stronger.
Responsibility and Commitment	Every member of a great team is committed to and responsible for the success of their own role and looks to support their team mates wherever possible.
Communication	Where are we going, why are we going and when will we get there?
Quality	“There is no substitute” OK, stole that one, but it is very true. We value quality in everything we do, we might produce premium and budget products but we will always use the best materials, tools and practices. If it’s worth doing, it’s worth doing properly.
Community	Our business is part of the community and will only prosper if our community is healthy and vibrant. Wherever possible we support community projects and requests for assistance.
Environment	We believe that our plants improve the environment, so our practices and principals must do the same. Not everyone will agree with our decisions, but we always remember our environmental responsibility.
Gardening	Often we get wrapped up in the process of ‘manufacturing’ plants. We value gardens, gardening and gardeners because they are such an important part of the identity of our society.
Fun	Gardening might be good for you, it may be good for the environment, it may even have artistic merit, but nobody will garden if they don’t have some fun.

## **Scotsburn – A Boutique Production Nursery.**

We've been training in business planning and now we have a Mission and Values. Of course this is what we have been trying to achieve all along without having written anything down. I have used the boutique winery analogy previously and I am constantly nagging our team with sport metaphors, so for something different I have recently been comparing Scotsburn to a Jazz Band.

A Jazz band? Yep. There is that constant effort to find something special and new within the context of a simple format. Each Spring season we try to create the next hit album without drifting too far into the unlistenable (yes I did invent that word) experimental. At Scotsburn we grow annuals and some perennials from seed. That's it really, but we reckon that we do it with that little extra touch of style that can only be achieved in a small business. We are specialists in the field and we will look at every opportunity to add quality and value to all the plants we grow.

The great improvisational Jazz players practice for years to master their craft. Similarly we have reached the stage that we are confident that our plants will be the best available because we enjoy the craft of growing and we have the experience, discipline and skills to ensure that we consistently produce the highest quality.

The presentation of our seedlings and colour pots is intended to be fresh and bright. We aim to attract consumer attention on your benches and to turn stock over quickly. Of course as growers our focus is on producing plants that will 'hold' in the retail environment and thrive once taken home. Our contact details are printed on our labels because we are confident of the quality of our plants.

Bedding plants are perishable products! Waste, shrinkage, dumpage, call it what you will, is the critical factor for both seedling growers and resellers alike. Experience tells us that minimising waste is only possible through careful planning and close communication between grower and seller. This is our specialist area and we have an enormous store of information that we would love to share with our retailers. Given the opportunity we have had remarkable success in both increasing selected retailer's turn over and reducing their wastage, simply by creating a close grower-retailer relationship.

Our catalogue is written primarily with our resellers in mind, although we hope it is equally useful to the various growers, councils and landscapers for whom we raise flower and vegetable seedlings. Our aim is to provide you with the highest quality product and service possible, and we hope that this catalogue enhances our service with concise, practical information.

Thanks for having a look. All the best for the season,

Peter Douglas  
Nursery Manager  
July 2007

***Funky Flowers for Groovy Gardeners***

Our core principals of customer service.

Adaptability	<p>We see flexibility as a key point of difference. Sowing our own seed is critical to our ability to tailor bedding plant products to suit specific retailer requirements. Our size and our physical and management set up allow for development of short run products to enhance the individuality of retailers.</p>
Branding	<p>We understand that very few horticultural brands are readily recognized by consumers. We have developed a range of product brands that are aimed at clearly identifying themselves on the retail shelf.</p> <p>Our labeling and Point of Sale promotional material is professional and distinctive offering the retailer a bedding display with a genuinely independent look and feel.</p>
Consistency of supply	<p>Seasons never run exactly to plan and in these days of tight margins bedding plant growers allow very little surplus production. Of course this can lead to a lack of available stock in times of higher than expected demand. Understanding that this is inevitable we have contingencies in our planning to minimize the impact. Most importantly we communicate constantly with our customers and work closely with key customers to ensure they are given first choice of available stock.</p>
Price	<p>Our pricing policy is to offer good value on all our product ranges. Our prices will not be the cheapest, but we will rarely be the most expensive.</p>
Product quality	<p>We always use the best quality materials available and as a NIASA accredited production nursery use industry best practice in all our processes. We offer a full replacement guarantee on all plants that we sell that do not perform to expectation in your display or the consumer's garden.</p>
Retail Display	<p>Where ever possible we integrate named varieties through our ranges to ensure that we keep constantly updating the retail display.</p>
Range	<p>A critical driver of bedding plant sales is the balance of range and availability. Our primary focus is on ensuring the best sellers are continuously available.</p>
Service	<p>There are many elements involved in business to business service, so ensuring we fulfill your requirements when and how you need is our first priority.</p>
Shrinkage	<p>Bedding plants are perishable products. We aim to develop strong relationships with our key retailers that encourage active and progressive retailing while protecting both parties from excessive Dumpage.</p>

## OUR MAN OF FLOWERS

David Oswald Wood,  
14<sup>th</sup> July 1915 – 6<sup>th</sup> December 2005

Our founder and mentor David Wood passed away on the 6<sup>th</sup> December 2005, aged 90. David was also a founding member of Bedding Plants Australia and an inaugural trader at NAIV's Trade day at Caribbean Gardens.

Throughout his working life David was employed within the floristry and horticultural industries. At 15 years he began work as a delivery boy for W T Vickerman Florist, Balaclava (in those days deliveries were by bicycle or tram). He could tell many a tall tale of deliveries around-and-about Melbourne, his favourite; delivering flowers to passenger ships at Princes Pier, Port Melbourne, where no doubt he dreamed of travel and exotic adventures. From there he moved on to become a driver/salesman for Fred Linton (operating as Fred Linton Nurseryman), though not entirely leaving his background of floristry behind. David frequently purchased flowers from the wholesale market and or picked foliage from his home garden and sold them to his retail customers (without Fred's knowledge).

In 1945 David, then 30 years old, purchased the business from Fred and renamed it Scotsburn Nurseries, after the Scotsburn estate in South Oakleigh where the nursery was sited. David successfully ran the nursery for many years and was extremely proud of his well known title "Uncle Dave" amongst the seedling growing fraternity. He was also justly proud of the next generation nurserymen who started their careers at Scotsburn and honed their skills before moving on to start their own businesses. His simple tenet was "hard work" at the sharp end of nursery production. His prowess as a salesman was quite legendary at the wholesale market; he acknowledged later in life that his real talent was perhaps as a salesman rather than a grower.

David retired in the early 1970s, leaving the nursery in the care of a manager, but continued his involvement and very keen interest in Scotsburn all his life. He was well satisfied when his children Robert and Janet involved themselves in the nursery in the mid 1980s, and was more than delighted when Peter, the eldest of his three grandsons opted for a career in horticulture and now manages Scotsburn.

David, like so many of his generation knew great hardship in his early life, but through sheer grit and determination he succeeded in his chosen path. As a family we are very proud of his endeavor and achievements and are grateful for his legacy. David is survived by his 2 children, 6 grandchildren and 11 great grandchildren.

Vale David.

Janet Douglas

July 2006.

## PREMIUM SEASONAL SPECIALS

Seasonally, we produce a selected range of premium colour pots: Cyclamen, Gerbera and Primula obconica.

### 1.1.1 CYCLAMEN ‘Latinia’

The ‘Latinia’ Cyclamen is the very latest in breeding from the Morel Seed Company, France. Previously we have grown true ‘mini cyclamen’. The ‘Latinia’ series is different however, as the flowers are large to mid size while the plant is still compact enough to be presented in 125mm pots. The multiple, centrally bunched flowers balance each pot beautifully. The main reason we chose ‘Latinia’ Cyclamen however was the fabulous colour range including: pure white, white with eye, scarlet-red, salmon with eye, deep salmon, brilliant rose, flamed salmon and bright purple. ‘Latinia’ Cyclamen will flower abundantly over a long period, remembering that like all flowering plants, optimum flowering comes with plenty of light. So display indoors for short periods only then return to a sunny, sheltered spot. Cyclamen will flower in successive seasons but it is essential to re-pot in late Spring with “fresh” potting mix. 12 x 125mm pots per carton.

### 1.1.2 CYCLAMEN ‘Miracle’

A miniature variety of Cyclamen with interesting patterned leaves and many dainty flowers that are held well above the leaves. Miracle Cyclamen are disease resistant and can be kept successfully for several flowering seasons. A bonus is their delicate perfume. ‘Miracles’ require similar growing conditions to those of ‘Latinia’. 20 x 100mm pots per carton.

Miracle and Latinia Cyclamen also make excellent outdoor bedding plants.

### 1.1.3 GERBERA Scotsburn Selection

Demand for Gerberas begins weeks in advance of their readiness. In other words Gerbera is the most popular seasonal crop we grow, their bright happy colours appeal to most customers. We have selected from a range of seed grown Gerberas, looking for compact habit (to 25cm), multiple flowers and a range of flower types including singles, doubles and dark eyed varieties. Colours range from white through cream, yellow, gold, orange, salmon, rust, scarlet and deep pink. Having selected our own colour mix we have emphasised the really bright reds, oranges and gold.

Gerberas are presented in 125mm pots. 12 per carton.

### 1.1.4 PRIMULA obconica ‘Twilley Touch Me’

With large, bright flowers in a great colour range over a long season and natural pest resistance, Primula obconica was one of the best potted-colour items available. There was however one problem, the natural pest repellent ‘primin’ was also an excellent people repellent, causing allergic skin reactions in growers, retailers and consumers. The ‘Touch Me’ series hybrid P. obconica has been bred primin free. ‘Touch Me’ is therefore a real break through in plant breeding, as the plant, while primin free, has retained good resistance to insect pests, great flower colours and growth habit.

The ‘Touch Me’ series obconica make an ideal pot specimen, as growth habit is compact with basal branching. Flower size and colour range is excellent; colours include blue, lavender, salmon, magenta, pink and white. ‘Touch me’ can also be grown outdoors in bright light and in a well sheltered position. Presented in 200mm pots. 5 per carton.

## ***FUNKY FLOWERS FOR GROOVY GARDENERS***

## **ORDERS AND DELIVERIES**

Any queries regarding stock can be addressed to our sales people who have more than seven years experience in the field, and are happy to advise on selection and display of your stock. Production staff at the nursery is also qualified and experienced and have access to an extensive range of material on cultural queries regarding any of our products.

Seedling and bloomer availability sheets are prepared each Monday morning or more frequently as required. For general order delivery we ask you to fax or telephone your requirements through by **12.00 noon the day prior to delivery**. We believe it is imperative for the retailer to replenish stock frequently, and consequently, we offer two regular calls per week. If, however, you need stock between your regular calls please contact us and we will do our very best to deliver within 24 hours. Wherever possible forward ordering for large quantities is appreciated.

Should you have any further queries please do not hesitate to contact

**Kaye, Peter or Jan by 'phone on 03 9798 7066, fax us on 03 9798 3121  
or E-mail us at: sales@scotsburn.biz**

## **TRADING TERMS**

- Minimum Order \$200.00
- Settlement discount:  
3% off the nett amount of invoices paid by the end the month following delivery.
- Delivery is free throughout the Melbourne Metropolitan and Geelong areas. Deliveries via Heath's or Van Berkels Plant Transport for country customers is free of charge but we must insist on \$300.00 minimum orders, otherwise a \$35.00 Delivery fee will be charged.
- Errors and Claims: please notify us within seven days of any invoicing errors or claims for replacement of stock so they can be dealt with immediately to our mutual satisfaction.

## **DISCLAIMER**

All our plants and seedlings are offered and sold subject to the following conditions of sale. The label photograph and description under which our plants and seedlings are sold signifies, no more than we believe they have been selected from reliable stocks and in no case does the description signify that the resultant crop will grow true to our description. We give no warranty expressed or implied, as to the description, growth, quality, purity or productiveness of the seedlings or other goods and will not be responsible for the resultant crop. We endeavour to maintain supplies of all the seedling varieties listed in this catalogue throughout the season; however, we feel we must warn customers that there are times when this is just not possible.

## AGERATUM

*Ageratum houstonianum*  
(ASTERACEAE)

Groups of tiny powder-puff type flowers, which form a compact head. Leaves are heart-shaped, mid-green. Frost tender. Makes an excellent border plant, or container specimen.

Blue Mink Powder blue flowers in large clusters, up to 8cm across. MFG  
40000

Jazz mix Shades of blue, pink and white. GS  
10005

**Height** 15cm  
**Spacing** 20 - 25cm  
**Planting to Flower** 6 weeks  
**Available** Aug - Jan.

## ALYSSUM

*Lobularia maritima*  
(CRUCIFERAE)

Pincushions of honey scented flowers, commonly referred to as "Sweet Alice". Good for rockeries and borders, performs best in Spring and late Summer, rather than the heat of mid Summer.

Alice White Masses of Snow White flowers on very compact plants. MFG  
10120

Easter Bonnet Great uniformity and compact habit. Colours include deep pink, rose, lavender, violet and white. FF  
85004

Snow Crystals Masses of Snow White flowers on very compact plants. FF  
85005

Blueberry Coulis Rich purple/violet flowers. MFG  
10117

Cameo A favourite blend of five pastel colours. MFG  
10110

**Height** 8cm  
**Spacing** 15cm  
**Planting to Flower** 5 weeks  
**Available** All year.

## AQUILEGIA

*Aquilegia vulgaris*

(RANUNCULACEAE)

Old fashioned Columbines (Granny's Bonnets) are well loved by many gardeners. Noted for its unusual flower form, with two layers of petals forming the flower with long or short spurs at the flower base. A perennial that may be used as a border or for informal planting and containers. Preferring to be planted in the cooler months for early Spring flower display, they are cold and frost tolerant, but need shelter from direct sun.

McKana's Giants      Very large flowers in clear colours with long attractive spurs.  
30810      GS

**Height**                      40 - 50cm

**Spacing**                     30cm

**Planting to Flower**      12 weeks

**Available**                 Feb - Aug.

## ASTER

*Callistephus chinensis*

(ASTERACEAE)

Double or semi double daisy flowers. Dark green hairy, serrated leaves. Best to plant in different position each year to avoid disease. Excellent cut flower. Plant through the Spring for a bright Summer and Autumn flower display.

Perfection:      Mixed colours; including red, pink, blue and white. Wilt resistant.  
10223      MFG

**Height**                      75cm

**Spacing**                     25 - 30cm

**Planting to Flower**      10 weeks

**Available**                 Sep. - Dec.

## BEGONIA

*Begonia semperflorens*

(BEGONIACEAE)

Although originally a tropical plant, bedding Begonias thrive in Melbourne gardens. They are free flowering, through all but the coldest months, and though preferring shade during the heat of the day, adapt to a wide range of planting conditions. Great for pots, baskets and borders.

### **BEGONIA Continued.**

<u>Organdy mix</u> 40017	Bronze and green leaves, mixed colours.	MFG
<u>Rio mix</u> 10150	Bronze leaves, mixed flower colours.	GS
<u>Varsity mix</u> 10130	Green leaves with mixed colours.	GS
<b>Height</b>	20cm	
<b>Spacing</b>	20cm	
<b>Planting to Flower</b>	5 weeks	
<b>Available</b>	All year.	

### **CAMPANULA**

*Campanula medium calycanthema*  
(CAMPANULACEAE)

A cottage garden favourite. Tall stately flower spikes rise from a dense rosette of leaves. Flowers are often called ‘cup and saucer’ and are arranged along the spikes. Slow to flower, but well worth the wait.

<u>Canterbury Bells</u> 10144	Pastel colours, including blues, pinks, lavenders and white. Best grown in full sun but require some protection from extreme heat.	GS
----------------------------------	--	----

<b>Height</b>	50 - 60cm
<b>Spacing</b>	30cm
<b>Planting to Flower</b>	Approximately 5 months.
<b>Available</b>	Feb. - Aug

### **CALENDULA**

*Calendula officinalis*  
(ASTERACEAE)

A hardy annual, winter to spring flowering with wide flowers similar to chrysanthemum in a range of orange and yellows, and lance shaped leaves.

<u>Pacific Beauty</u> 30140	Double flowers in a blend of orange and yellows with some bicolours. dwarf bushy habit	MFG
<b>Height</b>	40-50cm	
<b>Spacing</b>	30- 40 cm	
<b>Available</b>	Feb- Aug	

## CELOSIA

*Celosia plumosa*

(AMARANTHACEAE)

Celosias are unusual plants which produce brightly coloured feathery plumes with contrasting lettuce green foliage. They require full sun, well-drained soil and shelter from the wind.

Kimono formula mix A dwarf variety, with good branching habit.

85021 Broad colour range; cream, orange, red, rose, salmon and yellow.

FF

**Height** 15 - 20cm  
**Spacing** 20cm  
**Available** Nov. - Feb

## CHRYSANTHEMUM

*Chrysanthemum spp.*

(ASTERACEAE)

A large genus of annual and perennial plants, ranging from ground covers to bushy shrubs. Mostly Summer/Autumn flowering.

paludosum Commonly known as swamp daisy. A small white  
40060 single flower with yellow eye. Prefers damp conditions.

MFG

**Height** 25cm  
**Spacing** 20cm  
**Planting to Flower** 8 weeks  
**Available** All year.

## CINERARIA

*Senecio spp*

(ASTERACEAE)

Showy annuals ranging from 30 - 45cm tall with flowers that form a large umbel in shades of red, blue, white, mauve, purple and bi-colours. Excellent for display beds and containers. Plant in Autumn for Winter to early Spring flowering. Keep well watered as the large leaves transpire quickly. Requiring frost free conditions and semi-shade.

Corsage (dwarf) Good colour range, of both solid and bi-colours, with  
30170 medium sized flowers.

MFG

Fifth Avenue Improved, dwarf variety. Rich colours; solid shades of  
30474 pink, rose, brick, blue and white, bi-colours in similar  
tones with white eye.

BPA

GS

**Height** 35 - 40cm  
**Spacing** 30 - 35cm  
**Planting to Flower** 12 weeks  
**Available** Feb. - Jul.

## COSMOS

*Cosmos bipinnatus*  
(ASTERACEAE)

Hardy annuals popular in cottage gardens. Mostly erect habit with fern-like leaves and very free flowering. Excellent for background planting. Good for cut flowers.

Berries n Cream (Dwarf)      Delicious shades of pink and cream.      NEW GS  
10184

**Height**                      45-60 cm

**Spacing**                     30cm

**Planting to Flower**      7 weeks

**Available**                 Oct- Jan

Sensation mix (Tall)      White, pink, mauve.      MFG  
10170

**Height**                     100cm

**Spacing**                    30 - 40cm

**Planting to Flower**      7 weeks

**Available**                 Oct. - Jan.

## DAHLIA

*Dahlia X Hybrida*  
(ASTERACEAE)

Double flowers, dwarf habit and a full colour blend. An excellent bedding plant or for containers. Flowers from November to May. Good cut flowers.

Hi Dolly                    Green leaf. Bright colours, medium sized flowers ranging from  
10190                    white to orange, red, crimson and pink.      MFG

**Height**                     50 cm

**Spacing**                    25 - 30 cm

**Planting to Flower**      10 weeks

**Available**                 Sep. - Feb.

## DELPHINIUM

*Delphinium elatum*  
(RANUNCULACEAE)

An elegant addition to any garden, either planted in drifts or as a perennial border.

Magic Fountains      Large semi double blooms on compact plants  
30190                    excellent for herbaceous borders or cottage gardens.  
                                 Colours include blues, lilac, pink, and white, some with  
                                 central "bee" marking. Excellent cut flower.

**Height**                     60 cm

**Spacing**                    30 - 40cm

**Planting to Flower**      Plant in Autumn for Spring flowering.

**Available**                 Mar. - Oct.

GS

## DIANTHUS

*Dianthus chinensis*

(CARYOPHYLLACEAE)

This popular annual from China has a short tufted growth habit and bears masses of single or double and sweetly scented flowers.

Corona Cherry Magic A mix of solid cherry, lavender with cherry centres and  
30395 tie-dyed lavender and cherry flowers. NEW GS  
The largest Dianthus, flowers are 6-8 cm across.

Corona Cherry Magic Refer above. FF  
85019

**Height** 30cm  
**Spacing** 20cm  
**Planting to Flower** 6 weeks  
**Available** All year.

Diamond mix A dwarf bedding variety selected for its early flowering and good  
85020 branching habit. Good colour, including Picotee types. FF

Persian Carpet A dwarf bedding variety with a good range of vibrant colours.  
30390 Persian Carpet needs a sunny position and well fertilised soil.  
Recommended for borders, massed planting and containers. GS

**Height** 15 - 20cm  
**Spacing** 20cm  
**Planting to Flower** 6 weeks  
**Available** All year.

## DIGITALIS

*Digitalis purpurea*

(SCROPHULARIACEAE)

Foxgloves are popular seedlings year round. Planted after March they will develop big strong rosettes of leaves and throw spikes as soon as September arrives. Planted anytime between September and March, Foxys will be flowering in about 12 weeks. Foxgloves, being very tall, add height and good background foliage and colour to any garden.

Foxy A mix of cream, pink and mauve. MFG  
10220

**Height** 90 - 100cm  
**Spacing** 30 - 40cm  
**Planting to Flower** 12 weeks  
**Available** All year.

## ERIGERON

*Erigeron karvinskianus*  
(ASTERACEAE)

The seaside daisy is a wonderful perennial lending itself to many garden situations. An ideal addition to a cottage garden where its gently trailing habit cascades rockeries, retaining walls, or pathways. A profuse flowerer most of the year; small, white flowers with a tinge of pink. An excellent hanging basket specimen.

<u>Karvinskianus</u> 10226	Soft, green, fern-like foliage; literally covered in masses of small, white flowers.	GS
<b>Height</b>	20 - 30cm	
<b>Spacing</b>	25 - 30cm	
<b>Planting to Flower</b>	6 weeks	
<b>Available</b>	All year.	

## FOXGLOVE

Refer Digitalis earlier.

## GAZANIA

*Gazania splendens*  
(ASTERACEAE)

A hardy perennial that does well in dry, exposed or coastal areas and makes a perfect ground cover. Gazania's have bright attractive daisy flowers.

**Kiss Series** A new F1 hybrid series, with excellent, uniform plant habit and a wide tolerance range through drought, heat and salt environments. Large daisy like flowers are produced on short sturdy stems. Excellent ground cover or for massed display. Available only in Funky Flower Packs.

<u>Kiss Bronze Star</u> 85022	Dark bronze centre with gold tips.	FF
<u>Kiss Golden Yellow</u> 85028	Warm gold-yellow.	FF
<u>Kiss Mahogany</u> 85023	Deep tan to red with olive green eye.	FF
<u>Kiss mix</u> 85029	Vibrant mix of colours.	FF
<u>Kiss Rose</u> 85024	Mid-rose petals with lighter tips.	FF
<u>Kiss White</u> 85026	Soft white.	FF
<b>Height</b>	20-25cm	
<b>Spacing</b>	25cm	
<b>Available</b>	Nov.-Apr.	

## GERANIUM

*Pelargonium x hortorum*

(GERANIACEAE)

There are over 300 species of annual, biennial and perennial geraniums. Most geraniums like growing in acidic, sandy and quick draining soil and will thrive with minimal attention, however they are irresistible to caterpillars.

Geranium Sprite mixed      An early flowering, dwarf and compact F2 mix, including  
10265      shades of red, rose, pink, salmon, and white.  
Leaves are both zoned and green leafed varieties.      MFG

**Height**                      25-30cm  
**Spacing**                    25cm  
**Available**                  All year

## GYPSOPHILA

*Gypsophila muralis*

(CARYOPHYLLACEAE)

A native of Corsica. It is adaptable to most soils in an open sunny position and is frost resistant but drought tender.

Gypsy Rose                      A very compact dwarf form, with tiny rose pink  
10270      flowers on fine feathery foliage. Ideal for garden  
beds or containers.      GS

Gypsy Rose                      Refer above.      FF  
85031

**Height**                      20-25cm  
**Spacing**                    25cm  
**Available**                  Mar.-Nov.

## HEUCHERA

*Heuchera sanguinea*

(SAXIFRAGACEAE)

Commonly known as “Coral Bells”, an old fashioned perennial, suitable for borders or casual planting in cottage gardens. Coral pink bell-like flowers borne on slender spikes with foliage that is often interestingly patterned. Plant through Autumn for Spring/Summer flowering.

Firefly                      Hardy perennial. A cottage garden plant with rich, deep coral,  
30205      fragrant flowers.      GS

**Height**                      40cm  
**Spacing**                    30cm  
**Planting to Flower**      12 weeks  
**Available**                  Apr. - Jul.

## IMPATIENS

*Impatiens wallerana*  
(BALSAMINACEAE)

According to the latest data from the United States Impatiens have now been the No 1 best selling species for the last 5 years. It is not hard to understand why; Impatiens have consistent great garden performance, they last at least 6 months in our climatic conditions and they have an incredible colour range that will shimmer in the shadiest spot.

### Single Flowered Impatiens.

<u>Accent Tango</u> 10282	Hotshot salmon and lilac.		GS
<u>Accent Tango</u> 85051	Refer above.		FF
<u>Accent Watermelon</u> 10286	New improved rose pink.		GS
<u>Accent Watermelon</u> 85050	Refer above		FF
<u>Bright Eyes</u> 85040	A full mix of bright, bold colours		FF
<u>Expo Raspberry</u> 10295	Unique rich raspberry flowers.		GS
<u>Heaven's Above</u> 10251	A mix of raspberry, coral, violet and rose, all with white star eye.	BPA	GS
<u>Impulse mix</u> 10250	Full range of colours.		GS
<u>Impulse Lilac</u> 10310	Deep lilac.		GS
<u>Ruby</u> 85055	Deep cranberry flowers.		FF
<u>Impulse White</u> 10290	Pure white.		GS
<u>Impulse White</u> 85055	Refer above.		FF
<u>Misty</u> 10285	A Scotsburn Special Blend, of Mosaic rose and lilac together with pure white.		GS
<u>Peach Butterfly</u> 10336	A Scotsburn Special Selection from the Tempo series, of soft peach with deeper coloured butterfly eye.		GS

## IMPATIENS Cont'd

<u>Sugarplum</u> 10283	A Scotsburn Special Blend, combining rich plum with apple-blossom pink.	GS
<u>Sugarplum</u> 85054	Refer above.	FF
<u>Summer Berries</u> 10278	A Scotsburn Special Blend of summer berry flavours Cherry, Raspberry and Cranberry. <b>NEW for 2007</b>	GS
<u>Tiny Tots</u> 10275	A full range of colours.	MFG
<u>Tiny Pastels</u> 10279	A blend of pastel colours.	MFG
<u>Tiny Pink</u> 10274	Deep rose pink.	MFG
<u>Tiny White</u> 10276	Pure white.	MFG
<b>Height</b>	25cm	
<b>Spacing</b>	25 - 35cm	
<b>Planting to Flower</b>	6 weeks	
<b>Available</b>	Sep. - Mar.	

### Double Flowered Impatiens

Double Impatiens are enormously popular with gardeners but quality double flowered plants have only been available from cuttings. Recent breeding has seen the introduction of varieties with vastly improved growth habit and a higher proportion of double flowers. Up to 90% of flowers have a degree of doubleness, however it is important to remember that only 25-30% of blooms are fully double. It is also important to let your customers know that 'doubleness' improves as the plant matures.

<u>Carousel mix</u> 10345	Carousel has a dwarf, well-branched growth habit. Flowers range, in colour from white through salmon to orange and red.	GS
<u>Carousel white</u> 10347	Pure white.	GS
<b>Height</b>	25-30cm	
<b>Spacing</b>	25 - 35cm	
<b>Planting to Flower</b>	6 weeks	
<b>Available</b>	Sep. - Mar.	

## KALE

*Brassica oleracea acephala*  
(BRASSICACEAE)

Ornamental cabbage or flowering Kale is an annual that provides both texture and colour in the winter garden.

<u>Kale Ornamental</u> 10348	Compact dwarf plants that form uniformly round heads with slightly crinkled leaves. Best performance in the cold winter months when the leaf colours of purple, red, pink, cream and grey-green are at their most intense.	MFG
---------------------------------	--	-----

<b>Height</b>	30cm
<b>Spacing</b>	30-35cm
<b>Planting to Flower</b>	6-8 weeks
<b>Available</b>	Jan. - Jun

## LOBELIA

*Lobelia erinus*  
(LOBELIACEAE)

Lobelias are available in two distinct types; ball and trailing. Plant through Spring for Summer and Autumn flowering and in Autumn for Spring flowers. Recommended for borders, containers and hanging baskets.

### New Hybrid Varieties

What characteristics do plant breeders look for when developing Lobelia varieties? The ability to hold a compact shape (for ball varieties) and early flowering. Riviera Lobelia deliver both of these attributes, being comfortably two weeks quicker to flower than other varieties and holding their shape exceptionally well. Such early flowering makes them great in garden beds, and small containers. In larger containers and baskets, where the effect of spilling foliage and cascading flowers is required, try the Regatta Lobelias. They also have been bred for early flowering, which is particularly important for quick retail sales. We are now offering a wider range of trailing Lobelia as container gardening continues to gain popularity.

### Trailing Types

<u>Regatta mix</u> 10359	A blend of lilac, dark blue, sky blue, rose and white.	GS
<u>Regatta Navy Blue</u> 10357	Dark blue with bronze foliage.	GS

## LOBELIA Continued

### Ball Types

<u>Cambridge Blue</u> 10400	Mid blue flowers on green foliage.		MFG
<u>Crystal Palace</u> 10370	Dark blue flowers on bronze foliage.		MFG
<u>Lightning Blue</u> 10415	Striking blue flowers with white eyes.	BPA	GS
<u>Paper Moon</u> 10380	White flowers on green foliage.		MFG
<u>String of Pearls</u> 10410	A mix of flower and leaf colours.		MFG
<u>Riviera Midnight Blue</u> 85065	Dark blue flowers on bronze foliage.		FF
<u>Riviera mix</u> 85066	A mix of full colour range.		FF
<u>Riviera Rose</u> 10353	Rose with a white eye.		GS
<b>Height</b>	15cm		
<b>Spacing</b>	20cm		
<b>Planting to Flower</b>	6 weeks		
<b>Available</b>	All year.		

## MARIGOLD - AFRICAN

*Tagetes erecta*  
(ASTERACEAE)

Marigolds love the Melbourne Summer and make a wonderful display of massed colour with their big double, ball flowers. They enjoy a sunny position, but are frost tender and provide tasty snacks for snails. Marigolds will flower over a long period; from late October through to April/May.

### Dwarf African Hybrid

<u>Antigua mix</u> 10487	A vigorous dwarf variety with large ball type flowers, suitable for cooler climates. Ideal for containers, baskets and bedding plants.		GS
<b>Height</b>	25 - 30cm		
<b>Spacing</b>	20cm.		
<b>Planting to Flower</b>	8 weeks		
<b>Available</b>	Aug - Feb.		

## MARIGOLD – AFRICAN Continued

### Medium-Tall hybrids.

Excellent bedding plants, with heavily petalled double flowers, which shed water, improving longevity. Ideal for mass planting and containers.

<u>Inca Orange</u> 10485	A large flowered variety, early flowering, vigorous yet compact plants.		GS
<u>Jezebel</u> 10480	A uniform hybrid mix of yellow, gold and orange with extra large flowers. Also known as Gay Ladies.	BPA	GS
<u>African Queen</u> 10486	Bright Yellow flowers.	BPA	GS

<b>Height</b>	40cm
<b>Spacing</b>	30cm
<b>Planting to Flower</b>	8 weeks
<b>Available</b>	Aug. - Feb.

## MARIGOLD - FRENCH

*Tagetes patula*  
(ASTERACEAE)

A range of dwarf Marigolds that grow well in the hot sun. French Marigolds are classified according to their flower characteristics, most are double, some with crested centres. They flower quickly, with a broad range of patterns and strong colours. French Marigolds give one of the best massed colour effects of all the flowering annuals. Marigolds are very frost tender and snails find them very tasty.

### The Boy series

<u>Dwarf Boy'o'Boy</u> 10430	Masses of large, double, 'crested' flowers in yellows, oranges and reds. Compact plant habit. Particularly robust in hot, dry and sunny conditions.	MFG
<u>Dwarf Orange Boy</u> 10450	Deep orange flowers.	MFG
<u>Dwarf Yellow Boy</u> 10440	Bright lemon-yellow flowers.	MFG

<b>Height</b>	20-25cm
<b>Spacing</b>	25cm
<b>Planting to Flower</b>	7 weeks
<b>Available</b>	Aug. - Feb.

## MARIGOLD – FRENCH Continued

### Durango Series

<u>Bee</u> 85070	Uniformly shaped extra large flowers (Safari type) 5cm across. Bushy compact plants. Mahogany flowers edged with yellow. medium-size flowers per plant.		FF
<u>Orange</u> 85073	A good strong orange.		FF
<u>Yellow</u> 85072	Deep yellow.		FF
<u>Simba</u> 10481	A mix of yellow, red, tangerine and bolero (red and yellow mottled petals). Plants are compact and have good branching habit, with many medium-size flowers per plant.	BPA	GS
<u>Simba</u> 85071	Refer above	BPA	FF
<b>Height</b>	20-25cm		
<b>Spacing</b>	25cm		
<b>Available</b>	Aug. - Feb.		

## NASTURTIUM

*Tropaeolum majus*  
(TROPAEOLACEAE)

Frost tender annuals that do best in full sun, but can take semi-shade. Nasturtiums meander wonderfully, filling in spaces. They are particularly good on sunny banks and in containers. Nasturtium leaves and flowers are edible. In salads the leaves add a peppery flavour, while the yellow, red and orange flowers provide variety in colour and texture.

<u>Jewel mix</u> 10490	Dwarf variety, compact type. Colours include gold, scarlet, orange sulphur yellow and red.		MFG
<b>Height</b>	25 - 30cm		
<b>Spacing</b>	20 - 30cm		
<b>Planting to Flower</b>	7 weeks		
<b>Available</b>	All year.		

## NEMESIA

*Nemesia strumosa*

(SCROPHULARIACEAE)

Nemesia is most commonly seen in Victorian gardens in the dwarf form. Nemesia make an excellent early Spring display in rockeries, containers or as a border and are at their best mass planted. They prefer a sunny well-drained position.

<u>Cabaret</u> 30496	Autumn 1999 release from BPA. Show stopping colours of yellow, golden sunset, red, pink, orange and creamy white.	BPA	GS
<b>Height</b>	20 - 30cm		
<b>Spacing</b>	25 - 30cm		
<b>Planting to Flower</b>	8 - 10 weeks		
<b>Available</b>	Feb. - Jul.		

## PANSY

*Viola X wittrockiana*

(VIOLACEAE)

Pansies must be one of the most popular annuals for gardens used in Melbourne. Our climate allows the bright colours and pretty faces of Pansies to be seen all year (given protection from the hot sun in January and February). Pansies are best known as Autumn/Winter seedlings but most garden centres find there is a demand for them all year. Pansies come in such a wide range of colours and shades we have listed: mixes, single colours and Scotsburn Special Blends separately.

### Mixed Colours

<u>Can Can</u> 10500	Crisp, clean colours with dark blotches.		MFG
<u>Jewel mix</u> 10515	Small to medium clear-faced flowers in a full range of colours including: blue, white, yellow; apricot, red, primrose, Beaconsfield blue and black.		GS
<u>Joker</u> 10505	An attractive mix of unusual colour combinations.		MFG
<u>Mikado</u> 10518	A blend of pastel pinks, lavenders and lemons.	BPA	GS
<u>Moonface</u> 30483	A large flowered mix of ten colours mostly with distinctive faces.	BPA	GS
<u>Moonface</u> 85160	Refer above.	BPA	FF
<u>Moonlight Bay</u> 10510	Vibrant blue with ivory white to primrose centres.	BPA	GS
<u>Moonlight Bay</u> 85159	Refer above.	BPA	FF

## PANSY Continued

<u>Regal Ruffles</u> 10520	Ruffled flower margins and very striking colours.		MFG
<u>Swiss Giant mix</u> 10504	An open pollinated, hardy variety, with medium to large flowers.		MFG
<u>Waterfall</u> 10513	A very popular blend of blue shades and white.	BPA	GS
<b>Height</b>	15cm		
<b>Spacing</b>	15cm		
<b>Planting to Flower Available</b>	8 weeks All year.		
<b>Single Colours</b>			
<u>Blue Shades</u> 10492	A blend of pure white, soft blue to deep purple all with dark blue blotch		MFG
<u>Pink Shades</u> 10493	From the merest hint of soft pink through to burgundy, with deeper rose blotch.		MFG
<u>Violet Shades</u> 10494	A blend of violet shades including white, all with deep violet blotch.		MFG
<u>Madame Butterfly</u> 85155	Blend of vivid blues, with rich yellow centre.	BPA	FF
<u>Sea Shell</u> 85163	From the palest blue through to rich blue, all sharing common dark blue blotches.	BPA	FF
<u>Sherry</u> 10528	A unique blend of warm shades, from creamy apricot, through yellow to dark pink. Very large flower.		GS
<u>Sherry</u> 85148	As above.		FF
<u>Swiss Giant Blue</u> 10495	Dark blue with blotch.		MFG
<u>Swiss Giant Red</u> 10498	Red with golden eye and blotch.		MFG
<u>Swiss Giant White</u> 10496	Clear faced white.		MFG
<u>Swiss Giant Yellow</u> 10497	Clear faced yellow.		MFG
<u>Turbo Orange Blotch</u> 10506	Large orange flowers with dark blotch.		GS
<u>Turbo Purple</u> 10507	Rich velvety purple flowers with dark blotch.		GS
<u>Universal Pure White</u> 10523	Large pure white blooms with a yellow eye.		GS

<b>Height</b>	15cm
<b>Spacing</b>	15cm
<b>Planting to Flower</b>	8 weeks
<b>Available</b>	All year.

## PETUNIA

*Petunia x hybrida*  
(SOLANACEAE)

Petunia, originally a cultivar from Argentina, is now one of the most popular Summer flowering annuals. Each year the range of Petunia cultivars increases and their flowers seem to become more stunning. Flowers are basically trumpet-shaped, many cultivars being ruffled and/or double petalled adding to the impact they create in the garden.

Petunias are able to tolerate a wide range of weather conditions. They thrive in light, fertile, well-drained soil in a sunny position. Water sparingly during dry spells as over-watering spoils their flowers. Heavy Summer rain storms often create havoc with Petunias, however recently released Petunias have been bred especially to tolerate extreme weather conditions, as well as maintaining very compact and uniform growth. Excellent examples of these weather tolerant varieties which we recommend included the fantastic Fiesta series (single colours) and Scotsburn Special Blends.

Petunias are very versatile; they can be used as bedding plants for massed display, borders, rockeries, containers, window boxes and hanging baskets.

The Petunias we grow come in two types:

**Grandiflora**, large showy flowers.

**Multiflora**, slightly smaller flowers.

The difference? Not much, once in full bloom there are so many flowers the foliage is mostly hidden.

### Grandiflora varieties

#### Fiesta series

Fiesta petunias have that “wow” factor! We have selected from the very best hybrid Petunias available to create a range that can guarantee your customers, success. How? First by choosing varieties that produce strong, vigorous and compact plants. Then we select for vibrant flowers that hold their colour in all weather conditions. Give your gardeners success and they’ll keep coming back for more.

#### Grandiflora single flowered mixes:

<u>Blue Harmony</u> 12010	Scotsburn Special Blend, of blue shades with hints of mauve and pink.	GS
<u>Blue Harmony</u> 85080	Refer above.	FF
<u>Britannia</u> 12000	Scotsburn Special Blend, of red white and blue some with a white star.	GS
<u>Colour Parade</u> 10800	Popular mix, good range of solid colours, some with stripes.	MFG
<u>Coonawarra Star</u> 10908	Scotsburn Special Blend, of rich burgundy together with burgundy star.	GS
<u>Coral Sands</u> 12020	Scotsburn Special Blend, of coral, watermelon and butter cream.	GS

## **POLYANTHUS**

*Primula veris elatior*  
(PRIMULACEAE)

An old favourite with Melbourne gardeners, large strong flowers held aloft on a central stem. Bright, bold colours. Frost tolerant; perform best in a sunny position. This year we have included single colours in our range.

<u>Claude Wood strain</u> 30556	Bred and produced by Claude and Gary Wood with Melbourne conditions in mind. For vigour, hardiness, flower size and stunning colours, Melbourne's own Polys are a must.	MFG
<u>Hoopla</u> 30557	A Scotsburn Special Blend. All flowers have a red loop surrounding a yellow eye. Colours include a range of rose, pale pinks and salmon through to yellow.	GS
<u>Pacific Giant mix</u> 30550	Complete colour range.	GS
<u>Pacific Blue Shades</u> 30551	From pale to deep blue.	GS

**POLYANTHUS Continued next page**

## PORTULACA

### *Portulaca grandiflora* (PORTULACACEAE)

“Ports” are succulent plants that grow very well in sandy soils. Their semi-double flowers come in hot pinks; oranges, reds and yellows that have a translucent sheen, which makes them, glitter in the sun. Portulaca seedlings start selling in Melbourne in September but are better not planted until all chance of frost has passed. They will bring a touch of brilliance to that dry sunny spot in the garden.

<u>Cocktail</u> 10652	A rich carpet of fully double flowers in; red, yellow, orange, deep pink, and all the shades between. Cocktail Ports, from the Sundial series, have been bred for compact growth habit and flowers that will stay open longer than any other Portulaca.	BPA	GS
<u>Night Owl</u> 10650	A showy mix of semi-double and double blooms; including bright oranges and yellows through to soft pastel shades.		MFG
<u>Pink Spice</u> 10654	A Scotsburn Special Blend, selected from the Sundial series, with fully double flowers in beautiful tropical colours of fuchsia, cream, peppermint and pink.		GS
<u>Sunburst</u> 10653	A Scotsburn Special Blend, selected from the Sundial series, with fully double flowers in sunny citrus colours of orange, yellow and crisp white.		GS
<u>Sunseeker mix</u> 85125	A new variety with more compact growth habit double flowers. Richly coloured, fully double flowers.		FF
<b>Height</b>	20cm		
<b>Spacing</b>	20cm		
<b>Planting to Flower</b>	7 weeks		
<b>Available</b>	Oct - Feb.		

## PRIMULA

### *Primrose* (PRIMULACEAE)

A large family of perennials that do best in cool conditions. Primulas vary widely in style, colour, and texture and are always a favourite in Winter gardens.

#### *P. acaulis*

A primula variety, fast becoming one of the most popular bedding plants. *P. acaulis* leaves form a compact rosette. The multiple flowers grow one per short stalk from the centre of the leaf rosette rather than from a central stem. Colours are clear and bold.

<u>Danova mix</u> 85129	Early to mid-season flowering. Twelve strong colours.	FF
<u>Diamond Mix</u> 30490	A good range of all colours.	GS

**PRIMULA Continued next page**

## PRIMULA Continued

### Scotsburn Special Blends

<u>Cinnabar</u> 30505	A Scotsburn Special Blend. Autumn tones of tangerine, salmon, cream and scarlet, all with yellow eye.	GS
<u>Kismet</u> 30506	A Scotsburn Special Blend. A mix of blue with red eye, light blue, lemon, magenta and pink.	GS
<u>Seaspray</u> 30507	Seaspray a blend from the Quantum series, bred for extra early flowering and compact growth, in jaunty nautical colours: white, golden yellow and dark blue, all with yellow eye.	GS
<u>Seaspray</u> 85128	Refer above.	FF

<b>Height</b>	20cm
<b>Spacing</b>	20cm
<b>Planting to Flower</b>	8 weeks
<b>Available</b>	Mar - Jul.

### *P. malacoides.*

The 'Chinese Fairy Primrose' *P. malacoides* flowers are described as candelabra type owing to their rather dainty arrangement of whorls around a fine central stem. In Melbourne they are best grown in full sun to semi-shade to keep plants compact, and prevent the establishment of Botrytis (fungal disease), but gardeners need to be aware that they can be burnt by heavy frosts. Colours range from white through to various shades of pink to deep purple.

*Primula malacoides* give one of the best massed colour displays for late July/August. They also make great container plants with long lasting flowers that can be moved indoors for short periods.

*P. malacoides* is a perennial species that is usually treated as an annual. The foliage contains the natural pest repellent Primin making it resistant to most common garden pests and diseases (except Botrytis). Primin, however, may also cause allergic reactions in some people. The Primin content of *P. malacoides* is lower than in *P. obconica* so they are much less likely to cause allergies.

<u>Carmin Glow</u> 30300	Magenta.	MFG
<u>Gilhams White</u> 30260	White.	MFG
<u>Lavender Lady</u> 30270	Lavender.	MFG
<u>Lollipops</u> 30310	A mix of carmine, lavender, ruby and white.	MFG

**PRIMULA malacoides Continued next page**

## **PRIMULA malacoides Continued**

<u>Promenade</u> 30545	Solid colours of salmon, two shades of pink, lavender and white. Bi-colours have darker eye with lighter edges.	BPA	GS
<u>Ruby Queen</u> 30290	Ruby red.		MFG
<u>Royalty</u> 30280	Lipstick pink.		MFG
<u>Zoom mix</u> 85126	Shades of crimson, lavender, pink, salmon and white.		FF
<u>Zoom White</u> 85127	Clear white.		FF
<b>Height</b>	30cm		
<b>Spacing</b>	20cm		
<b>Planting to Flower</b>	8 weeks		
<b>Available</b>	Mar - Jul.		

### ***P. Obconica.***

Primula obconica are closely related to P. malacoides being short lived perennials and having similar slightly hairy foliage, and candelabra type, whorled flowers. P. obconica is popular as a container variety as it has a broader colour range than P. malacoides, including true blues, reds and apricots.

Hybrid obconicas are true Greenhouse plants, that will grow well in a bright sheltered position and can be taken indoors for a few days at a time, any longer however and they will begin to lose colour and the foliage will stretch and ruin the plant's compact shape.

### **Libre series**

An early and basal branching crop, ideal for pots or bedding. Libre is bred to be totally free of Primin, to which many gardeners are allergic, it has however, retained good resistance to insect pests.

<u>Libre mix</u> 30560	Mid blue, lavender, salmon, magenta, pink and white.		GS
<u>Libre White</u> 30561	White.		GS
<b>Height</b>	30cm		
<b>Spacing</b>	20cm		
<b>Planting to Flower</b>	8 weeks		
<b>Available</b>	March - Jul.		

## SALVIA

### *Salvia farinacea* (LAMIACEAE)

The farinacea Salvias are the tall blue and white types. They are often confused with lavender and are well suited to cottage gardens. Bushy grey green foliage.

Gemstone Blue      Deep blue.      BPA      GS  
10680

Renaissance Blue      A new variety, very hardy and ideal for landscaping.      FF  
85255

**Height**      40 - 50cm

**Spacing**      20cm

**Planting to Flower**      9 weeks

**Available**      Oct - Dec.

### *Salvia splendens* (LAMIACEAE)

A popular bedding plant for both the home garden and landscaping. Bright red flowers are held on upright stalks. Frost tender.

Bonfire      Tall, good for background planting.      MFG  
10660

Sizzler mix      A very compact dwarf variety, early to flower. Excellent colour range including several bi-colours.      FF  
85250

**Height**      25 - 30cm – Dwarf

40 - 50cm – Tall

**Spacing**      20cm

**Planting to Flower**      9 weeks

**Available**      Oct - Dec.

## SNAPDRAGON

### *Antirrhinum majus* (SCROPHULARIACEAE)

Brightly coloured two lipped flowers borne on spikes. Taller varieties make excellent cut flowers and give a tremendous show when background planted. Dwarf varieties are excellent for border planting.

Coronette      A medium variety, vigorous plants with large blooms. Tolerant to adverse weather. Good colour range.      MFG  
10695

**Height**      45 - 50cm

**Spacing**      20cm

**Planting to Flower**      8 weeks

**Available**      All Year.

**SNAPDRAGON Continued next page**

## SNAPDRAGON Continued

Jelly Beans A unique mix of colours; yellow, red, carmine, white, lilac, and white and lilac
