

PRETTY IN PINK

DIANTHUS

Corona Cherry Magic

DIANTHUS CORONA CHERRY MAGIC

Dianthus is a great landscape and container plant with masses of bold flowers that last for ages. Corona Cherry Magic has the largest flowers of all Dianthus in a mixture of solid cherry, lavender with cherry centres and "tie dyed" lavender and cherry. Compact (20-25cm) plants grow best in full sun and require remarkably little water.

PORTULACA

Pink Spice™

SNAPDRAGON

Berry Delight™

GYPSOPHILA

GYPSY ROSE

COSMOS

Berries N Cream

COSMOS BERRIES & CREAM

A wonderful compact (45-60cm) form of a cottage garden favourite. Delicious Pink shades with white and cream daisy flowers on feathery, blue-green, glossy foliage. Cosmos are drought hardy and grow best in dry conditions; they also set seed freely so pick the flowers if you don't want 'volunteers' in your garden next year.

PORTULACA PINK SPICE

A hot new mix reminiscent of languid summer nights.

Portulaca Pink Spice™ is a steamy blend of fuchsia, cream, peppermint, and pink that will provide a soothing feature in hot summer gardens. Pink Spice™ is selected from the Sundial™

Portulaca series. Sundial™ Portulacas have masses of large double flowers on particularly compact plants. Pink Spice™ creates a carpet of colour in mass bedding displays and borders. Rockeries, retaining walls, containers and hanging baskets sparkle with Portulaca colours in the hottest part of the summer.

SNAPDRAGON BERRY DELIGHT

Imagine the mouthwatering colours of mixed summer berries and the shades created when a dollop of cream swirls. Delicious! Sadly we can't eat them but the effect is so easy to achieve in pots, baskets and garden beds with Snapdragon Berry Delight™. Selected from the Montego Series, Berry Delight™ is easy to grow year round in most Australian conditions. Their best flower displays begin in spring and last right through autumn. Berry Delight is a Dwarf Snapdragon 25-30cm tall.

GYPSOPHILA GYPSY ROSE

A dwarf (20-30cm) garden form of a florist's favourite. Masses of tiny rose pink flowers on fine feathery foliage. Gypsy pink is a terrific round and compact plant for garden beds and containers. Gypsophila Gypsy thrives in hot sunny positions on very little water.
